INSTALLATION GUIDE

This product must be installed by a licensed plumber. This is a general installation guide - there are many factors involved that can alter the installation method. AU/NZ: For installations within Australia and New Zealand, this product must be installed in compliance with AS/NZS 3500. UK: For installations in the United Kingdom this product must be installed in compliance with the Water Supply (Water Fittings) Regulations and Water Supply (Water Fittings) (Scotland) Byelaws. Other: For installations outside these countries, this product must be installed in compliance with the standards in your respective country.

- 1 Use a 35mm hole saw to drill the holes out.

- 2 1. Screw spindle into breech.
2. Screw brass nut and plastic washer onto breech.

- 3 Screw the base plates to the in-bench bodies and tighten the nuts underneath. Screw the compression tee fitting to your spout.

- 4 Fit the handles. Use flexi hoses to connect the bodies to the water source (**flexi hoses not included**).

Tip: If your handles are slightly off parallel you can return to step 2.1 and adjust the spindle's rotation fractionally.
