INSTALLATION GUIDE

Note: This product must be installed by a licensed plumber. This is a general installation guide - there are many factors involved that can alter the installation method. **AU/NZ:** For installations within Australia and New Zealand, this product must be installed in compliance with AS/NZS 3500. **UK:** For installations in the United Kingdom this product must be installed in compliance with the Water Supply (Water Fittings) Regulations and Water Supply (Water Fittings) (Scotland) Byelaws. **Other:** For installations outside these countries, this product must be installed in compliance with the standards in your respective country.

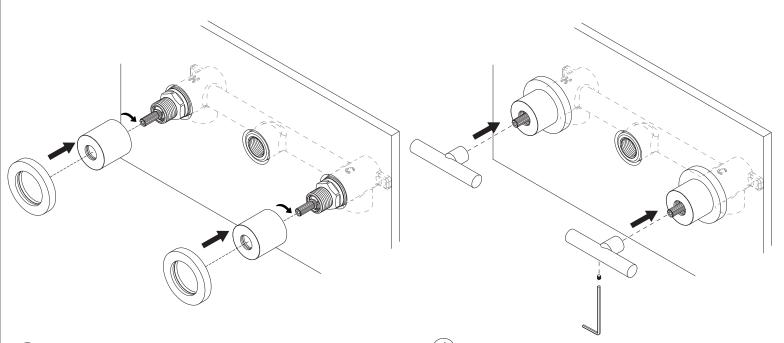

New Build - Install breach in desired position (please refer to additional install information regarding breach set backs). **Retrofitting Existing** - Remove existing tapware & reseat body seats until shiny and smooth.

- Remove locking nut from spindle. Screw spindle into breach and hand tighten until rear of spindle meets the body seat, be sure not to over tighten. If necessary apply more pressure lightly with spanner.
- 2 Fit the fibre washer over the spindle. Screw on the locking nut and tighten with spanner. TEST AND CHECK FOR LEAKS.

- Install the handle body onto the locking nut, twisting by hand until tightened. Slide back plate over handle body until firmly pressed against finished wall surface.
- 1) Install tap handle onto spindle and tighten in place using grub screw and allen key.

Regularly clean with mild liquid detergent or soap and water.

DO NOT use cream cleaners or bleach.
These substances are abrasive.

DO NOT use cleaning pads with abrasive surfaces as this may scratch the material.
