MATERIAL

Stainless Steel 304

TEMPERATURE RATING

Maximum continuous working temperature 75°C
If the water temperature exceeds 75°C, an approved tempering valve must be fitted

PRESSURE RATING

Recommended minimum working pressure 0.2 Bar
Recommended maximum working pressure 5 Bar
Hot and cold water inlet pressure should be equal

SUITABLE HOT WATER UNITS

Storage tank: Yes
Continuous Flow: Yes
Gravity Feed: Suitable

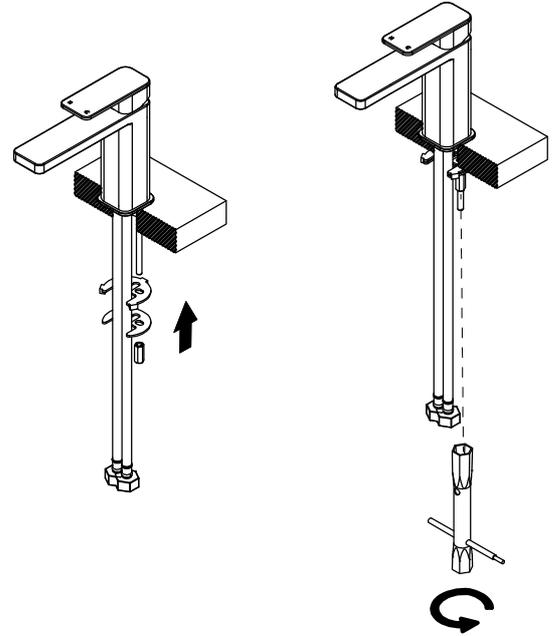

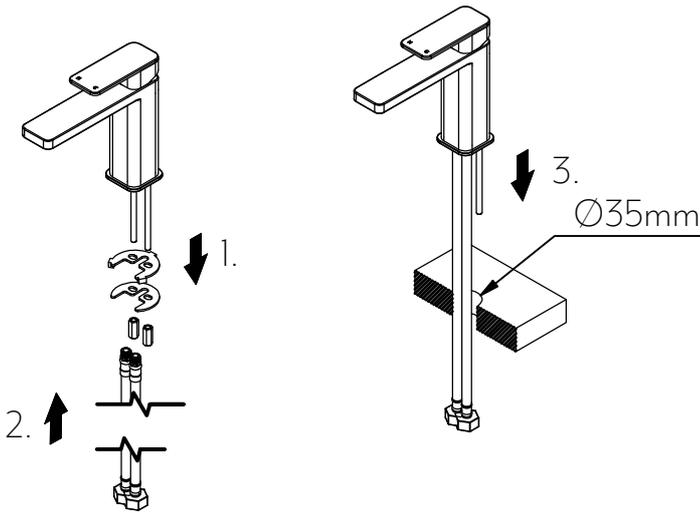

INSTALLATION GUIDE

Note: This product must be installed by a licensed plumber. This is a general installation guide - there are many factors involved that can alter the installation method. **AU/NZ:** For installations within Australia and New Zealand, this product must be installed in compliance with AS/NZS 3500. **UK:** For installations in the United Kingdom this product must be installed in compliance with the Water Supply (Water Fittings) Regulations and Water Supply (Water Fittings) (Scotland) Byelaws. **Other:** For installations outside these countries, this product must be installed in compliance with the standards in your respective country.

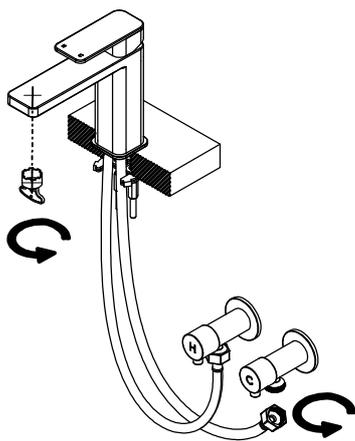

- ① Mark hole in bench top at desired location and drill 35mm hole.
 1. Remove locking nuts and washers.
 2. Install flexi hoses into basin mixer.
 3. Feed flexi hoses through bench top cutout one at a time.
 *Note Ensure rubber is correctly recessed into base plate.

- ② Replace both washers, ensuring that the rubber washer goes on first.
 Replace locking nuts and use an extended wrench socket or spanner to tighten.

- ③ Connect Flexi hoses to hot and cold outlets and tighten.
 Tighten aerator with provided tool so that it cannot be removed by hand.
 Test and commission for leaks

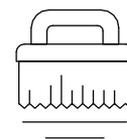

In The Box	
1 x Basin mixer	
1 x Rubber washer	
1 x Metal washer	
2 x Fixing rod	
2 x Locking nut	
1 x Aerator removal tool	
2 x Flexi hose	

Regularly clean with mild liquid detergent or soap and water

DO NOT use cream cleaners or bleach. These substances are abrasive

DO NOT use cleaning pads with abrasive surfaces as this may scratch the material
